

## **Section XIII**

### **Databases and Report Writers**

#### ***Facility Utilization and Cost Database***

This database contains detailed projected utilization and costs by Facility (MCCV) for each fiscal year from 2001 through 2022. The provided Excel Facility Report Writer will translate any cell from the database and any summary from the database into a nicely formatted and interpreted Table. The Excel Facility Report Writer contains instructions and examples for creating these reports. All values in the database are absolute utilization and expenditure amounts. Therefore, any number of cells can be combined by adding all of the enrollment, utilization and expenditure amounts. The database contains the following detail fields:

- Preferred VISN
- Preferred Facility (MCCV)
- Enrollee Type (1 = “Enrollee Pre”, 2 = “Past Enrollee Post”, 3 = “New Enrollee Post”)
- Priority Level (1 to 6, 7a, 7c)
- Age Group (Under Age 45, Ages 45 to 65 and Age 65 and Over)
- Fiscal Year (2001 to 2022)

#### ***County Utilization and Cost Databases***

These databases contain detailed projected utilization and costs by State and County (FIPS). There is one database for each fiscal year from 2001 through 2022. The provided Excel County Report Writer will translate any cell from the database and any summary from the database into a nicely formatted and interpreted Table. The Excel County Report Writer contains instructions and examples for creating these reports. All values in the database are absolute utilization and expenditure amounts. Therefore, any number of cells can be combined by adding all of the enrollment, utilization and expenditure amounts. The databases contain the following detail fields:

- VISN of the County
- State and County FIPS code
- Enrollee Type (1 = “Enrollee Pre”, 2 = “Past Enrollee Post”, 3 = “New Enrollee Post”)
- Priority Level (1 to 6, 7a, 7c)
- Age Group (Under Age 45, Ages 45 to 65 and Age 65 and Over)

- Fiscal Year

### ***Average Enrollment Databases***

These databases contain the projected average number of veterans enrolled during each year of the 24-year projection period. The Facility Enrollment Database contains Facility and VISN detail and the County Enrollment Database contains State and County (FIPS) detail, as well as the VISN of the county. The databases contain the following fields

- Preferred MCCV and VISN – Facility Enrollment Database Only
- FIPS and VISN of Residence – County Enrollment Database Only
- Enrollee Type
- Priority Level
- Gender
- Age Range in 5-year bands (1 = <25, 2 = 25 to 29, ..., 13 = 80 to 84, 14= 85 and over).
- Enroll0 to Enroll24, which contain average enrollment for Fiscal Years 2000 to 2024 respectively.

### ***Fiscal Year-End Enrollment Databases***

These databases contain the projected number of veterans enrolled at the end of each year of the 24-year projection period. The Facility Enrollment Database contains Facility and VISN detail and the County Enrollment Database contains State and County (FIPS) detail, as well as the VISN of the county. The databases contain the following fields

- Preferred MCCV and VISN – Facility Enrollment Database Only
- FIPS and VISN of Residence – County Enrollment Database Only
- Enrollee Type
- Priority Level
- Gender
- Age Range in 5-year bands (1 = <25, 2 = 25 to 29, ..., 13 = 80 to 84, 14= 85 and over).
- Enroll0 to Enroll24, which contain fiscal year-end enrollment for Fiscal Years 2000 to 2024 respectively.

### ***Unique Enrollee Databases***

These databases contain the projected unique number of veterans enrolled during each year of the 24-year projection period. The Facility Enrollment Database contains Facility and VISN detail and the County Enrollment Database contains State and County (FIPS) detail, as well as the VISN of the county. The databases contain the following fields

- Preferred MCCV and VISN – Facility Enrollment Database Only
- FIPS and VISN of Residence – County Enrollment Database Only
- Enrollee Type
- Priority Level
- Gender
- Age Range in 5-year bands (1 = <25, 2 = 25 to 29, ..., 13 = 80 to 84, 14= 85 and over).
- Unique0 to Unique24, which contain unique enrollment for Fiscal Years 2000 to 2024 respectively.

### ***Unique Patient Databases***

These databases contain the projected unique number of enrolled veterans receiving services from the VHA during each year of the 24-year projection period. The Facility Enrollment Database contains Facility and VISN detail and the County Enrollment Database contains State and County (FIPS) detail, as well as the VISN of the county. The databases contain the following fields

- Preferred MCCV and VISN – Facility Enrollment Database Only
- FIPS and VISN of Residence – County Enrollment Database Only
- Enrollee Type
- Priority Level
- Gender
- Age Range in 5-year bands (1 = <25, 2 = 25 to 29, ..., 13 = 80 to 84, 14= 85 and over).
- Patient0 to Patient24, which contain unique patients for Fiscal Years 2000 to 2024 respectively.
